A Review on Importance of Smart Phone Applications in Sports, Health And Physical Education

Mr. Apurba Pal

Director of Physical Education
Dr. M. K. Umathe College, Nagpur
Rashtrasant Tukadoji Maharaj Nagpur University
Email – mr.apurbapal@gmail.com

Abstract:

In this review we try to know the importance of Smart Phone Applications in the field of sports, health and also in physical education. From the study we learn that today's life is very much simplify with the help of various type of features oriented application. It so much available in our hand that's mean our mobile. In the field of sports, health and physical education that can be teaching and training process is very much improved by the using of availability of mobile application. Presently we can get sports related new information through the mobile application like Sports news tracking, Esports, Event application. And maintain our health through various fitness application and has a trackable ability to improve our physical fitness. The mobile application also progress our teaching and learning ability throw the application and can be used anywhere and anytime just a single click.

Keywords:Physical Education, Sports, Smart Phone, Application, Health, etc.

Introduction:

Currently people expect to maintain all the things in their own hand that's why they all time connected with their mobile phone. In the current situation Smart Phone Applications support in training and teaching methods and it also help to reform to sports training, health related fitness and physical education. Now a day's uses of Smart Phone Applications have important effect on sports training program. Modern application like Sports news tracking apps, Team management apps, Ski resort apps, Sports event apps, Fitness apps, etc.

The easily available Smart Phone Applications make it easier for the trainer and coaches to design and planning innovative and effective training programs on the other hand it also helps the physical educators to prepare effective and easily understandable teaching lessons. The Speedy development in use of smart phone applications in sports have set the level of performance at height. Using these advanced smart phone applications continues to grow exponentially in the field of sports, health and physical education.

Importance of Sports Application:

- By using the various type of application they can involve in recommended or moderate in physical activity in each day.
- There are many applications that can be downloaded onto these smart phones which can improve the physical fitness of the players and help them engage with new sports.
- Using smart phone applications to encourage players to be more conscious of their health and also improve and monitor their physical fitness.
- Inside the classroom, many applications on smart phones can be used to monitor physical fitness and skill development.

Some important sports application:

- **Sports news tracking application-**

Sports news tracking applications are basically used for all kinds of information about a particular sport. It gives the information about in sports-related news, scores, stats and live streaming etc.

Some important sports news tracking application like – Flash Score, MSN Sports, 365Scores, BBC Sport, Live Score, Sofa Score, CBS Sports, Yahoo Sports, etc.

- **Esports application –**

This application basically used for follow favorite games, watch video streams, highlights, and clips, communicate in a live stream chat, receive push notifications about current or upcoming streams and this application allow viewers to stream competitions, connect with each other, and donate money to their favorite gamers.

Some important Esports application like – Twitch, Strafe, eForce, YouTube / YouTube Gaming, ESPN, etc.

- **Ski resort application:**

Ski resort applications allow users to have the perfect experience while skiing. These applications include Tracking, Weather forecasts, Maps, Booking, Safety kit, Communication features.

Some important Ski resort applications like - Mountain Hub, PeakFinder, Skiresort, GoSnow, Liftopia etc

- **Fitness application:**

Fitness application are applications designed by companies to keep you fit and healthy. The aim of these apps is to make your lifestyle healthier by tracking your food intake, water intake and workout pattern. Some apps even keep a track of your heart rate and blood pressure, which is beneficial for individuals with high blood pressure. Some health and fitness apps even have a health coach, who help their clients to achieve their health goals effectively.

Some important Fitness application like - Adidas Runtastic, Allsport GPS, Endomondo, FatSecret, FIT Radio, Fitbit, Fitness (Apple), Fitwell, Google Fit, Kidfit, MSN Health & Fitness, MyFitnessPal, RockMyRun, Runkeeper, Sports Tracker etc.

- **Event application:**

Event application are created for organizing various events. This application used to Complete program, Increase interaction, Stay connected and build your community, Increase sponsors revenue, Real-time event analytics, prepare a schedule, Information about teams and Information about organizers and sponsors. Most important event application is eventbase.

- **Teaching & Learning application:**

By using modern application teachers and educators can streamline their activities like keeping attendance, recording behavior, engaging students inside and outside the classroom with effective communication with mobile apps. In current situation this teaching and learning application play an important role.

Some important Teaching & Learning application like – Quizizz, TED, Pocket, Evernote, DIKSHA, Noon Academy, Dropbox, ClassDojo, Google classroom etc.

Purpose of the study:

This study based on your new technology related with teaching, learning, training, coaching, health fitness and sports utilization etc. this study significant that we have lot of prospect to achieve our goal in the field of sports, health and physical education. how Using application helps the student to progress faster and improve the ability most easily. And how various features oriented application can learn anywhere and anytime.

Conclusion:

Various features oriented application can easily be integrated into the health and physical education prospectus. the improvements of technology can act as an annoyance to teachers, it is our responsibility to use those in a positive manner to improve student learning.

Downloading a fitness app, which measures how far the player ran, their average speed during the run and how many calories were burned in the session.

Using mobile application for education purpose helps students to progress faster, but also improve their ability to use features oriented application. These apps can be used anywhere and anytime. Learning is a constant process and the focus has now completely shifted to eLearning. Due to the features oriented application students can learn at their place and take their time at understanding things.
